Missouri Weekly Cattle Auction Summary 12/20/21

Receipts: 38,166 Week ago: 38,311 Year ago: 28,749

Compared to last week, feeders under 750 lbs. sold steady to 5.00 higher, heavier weights sold mostly steady. Heavier weight cattle not as abundant now, as many, especially the high quality, ones have already been marketed at this point. The last full marketing week of the year saw very strong prices for the lighter weights though as prices continue to climb. The number of sales over the next two weeks will be very limited as barns take either one or two weeks off for the holidays. The weather continues to be quite odd for mid- December. Southern Missouri saw some heavy rains and flash flooding late in the week. The northwest corner of the state caught some high winds and had some power outages, but was spared most of the extreme damage that was seen into Iowa and north. Records highs were set again a few days last week, before cold came over the weekend, although another warm up is expected by Christmas. Surprisingly, cattle seem to be doing pretty well with all the temperature swings and most producers are not reporting a lot of health issues with calves they have in the weaning pens, despite the crazy weather. Negotiated feedlot sales were light this week, as the next two will be short holiday weeks and packers have most of the inventory they require just need enough to set a negotiated price for formula reasons as much as anything. As of Friday afternoon, confirmed volume was just under 47K head. Prices were a bit lower this week with live sales reported at mostly 136.00-138.00 and dressed sales mostly 218.00. Boxed beef cutouts lost some ground this week as well, choice closed on Friday at 263.01, down 1.53 and select at 248.28, down 3.96 from last Friday. The Missouri Stocker Formula consist of 8411 head with a weighted average weight of 546.28 lbs. and a price value of 174.67, 2.19 higher than last week.

Afternoon National Slaughter Cattle Review for 12/17/21

Thus far for Friday negotiated cash trading has been mostly inactive on light demand in Nebraska and the Western Cornbelt. Not enough purchases in either region for a market trend. Negotiated cash trading has been at a standstill in all other major feeding regions. The last reported market in Kansas was on Tuesday with live purchases at 138.00. On Wednesday in the Texas Panhandle live purchases traded at 136.00. In Nebraska on Wednesday, dressed purchases traded at 218.00. The last reported live market in Nebraska was last week from 138.00-140.00. The last reported market in Colorado was last week with live purchases at 140.00. Last week in the Western Cornbelt live and dressed purchases traded from 138.00-140.00 and from 218.00-220.00, respectively.

MISSOURI WEEKLY HAY SUMMARY 12/17/21

Another week of bizarre December weather in the state with several temperature records broken once again. Lack of winter moisture is resulting in several areas getting dry. Just over 50 percent of the state is listed as abnormally to moderately dry, according to the latest drought monitor. On a national scale, there isn't a lot left west of the Mississippi River not considered dry at this point. The only plus side to this is farmers have got more fall tillage done than they can ever recall. Despite the continued climbing of fertilizer prices, many are still getting anhydrous cut in. Here in the state, hay movement remains slow as feeding needs just haven't been very high with the current weather. The supply of hay is moderate and demand is light to moderate and prices mostly steady. The Missouri Department of Agriculture has a hay directory visit <http://mda.mo.gov/abd/haydirectory/> for listings of hay <http://agebb.missouri.edu/haylst/>
